## Soil Sample Submittal Form Instructions

### 1. Purchase Your Soil Sample Sheet

Visit [MagnetOutdoors.com](https://MagnetOutdoors.com) to buy your Soil Sample Submittal Form.

### 2. Print Required Documents

Print BOTH your Soil Sample Submittal Form and your receipt (for proof of purchase).

### 3. Collect Your Soil Sample

You'll need:

- A shovel or soil probe
  - A bucket
  - A sturdy Ziploc bag
1. Take small, random samples from several spots in the area you plan to plant your food plot. The larger the area, the more samples you should take.
  2. Combine all the samples in the bucket and mix the soil thoroughly.
  3. Scoop at least 1 cup of the well-mixed soil into a Ziploc bag.

#### 4. Fill Out the Soil Sample Submittal Form

Include the following information:

- **YOUR ORDER NUMBER FROM YOUR RECEIPT AND THE TOTAL NUMBER OF SOIL SAMPLES ORDERED.**
- Your name, address, phone number, and email.
- Whether the sample is from an existing food plot or a new one.
- A name for your field (6 characters or less); write this clearly with permanent marker on the Ziploc bag as well as the Submittal Form.
- The state where the plot is located.
- Preferred delivery method for results (email is recommended for faster turnaround—usually within a few business days after the lab receives your sample)
- The crop(s) you plan to grow—select up to two. If your crop isn't listed (e.g., corn or soybeans), write it in the space provided.

Leola, PA 17540

**How To Soil Sample Video**

**Check ONE:** ☐ **ESTABLISHING NEW FIELD** ☐ **MAINTAINING EXISTING FIELD**

**FIELD NAME OR #:** 6 Numbers or Letters Maximum and Must Match Field Name on Bag

**What State is Plot Being Planted?** \_\_\_\_\_

**RESULTS**  
Results are emailed or mailed within 36 hours of receiving at the lab. Please select below how you would like to receive your results. Select only 1.  
**NOTE: Email results received much faster.**  
☐ **Email** ☐ **Mail**

**LAB USE ONLY**

**CROP TO BE GROWN**  
Check NO MORE than two. If no crops or more than 2 are marked, results will be for Founder's Blend and Trifecta.  
☐ Founder's Blend North (770)  
☐ Founder's Blend South (771)  
☐ Brassica Binge North (772)  
☐ Brassica Binge South (773)  
☐ Trifecta (774)  
☐ Simply Scatter (775)  
Other Crop: \_\_\_\_\_

**SAMPLING TOOLS**  
Tools that may be used to take a soil sample include a soil sampling tube, spoon, shovel, or spade. Soil sample tubes or augers should either be stainless steel or chrome plated. If a pall is used to collect the soil, it should be clean plastic to avoid any contamination from trace metals. For instance, soil will pick up zinc from a galvanized pall.

**SAMPLE INFORMATION**  
Fill in the sample information sheet completely, identify each soil sample (bag of soil) with a field name or number and make sure to fill in the "Field Name or Number" box above to match. Check the box on the blend you intend to grow. One sheet per test, one test per field. Place the Ziploc bag, information sheet, and proof of purchase (soil test receipt) put into an envelope or box and mail to the address above.

**COLLECTING THE SOIL SAMPLE**  
The soil sample collected should be from several locations within the plot or field to be planted. Data has shown that sampling multiple areas of the same location will tend to average out the variations inherent in most plots and help provide more precise results. When collecting the sample, scrape away plant residue and sample to 4-6 inches. Mix all soil gathered in a clean plastic container then take out soil and place in a heavy-duty Ziploc bag. A bag of soil is recommended to be sent for testing. Double bag each sample to reduce the chance of leakage during shipping. To save money, ship multiple samples in a single box, each submittal form and corresponding soil sample must be attached to each other.

#### 5. Attach the Soil Sample Submittal Form and Proof of Purchase to Your Sample

Securely attach the completed form to the matching Ziploc bag using a rubber band or stapler. If stapling, be careful not to puncture the bag. **IMPORTANT - You must also attach your receipt/proof of purchase to the soil sample.** We suggest rubber banding the documents to the Ziploc bag.

#### 6. Prepare for Shipping

Place your soil sample(s), with forms attached, into a box. You can include multiple samples in the same box. Pack tightly to minimize movement and prevent bags from tearing or opening.

**Send your package to:**

Magnet Outdoors Lab  
280 Newport Rd
